Feeding Amounts

Date/Time:	4/25 8 AM	11 AM	2 PM							
Hopper	12 ml's	14 ml's	10 ml's							
Bunny	14 ml's P	14 ml's	10 + 4 ml's							
Jelly Bean	14 ml's	10 ml's	12 ml's							
Peep	6 + 8 ml's P	6 + 6 ml's	14 ml's							
Reeses	12 ml's	10 ml's	12 ml's P							

Date/Time:										

How to use this chart:

When I am doing multiple rounds of bottle feedings during one meal time, I write the first amount they drank and then a + sign to symbolize a break before their next meal. That way I know what kittens to expect will want multiple goes at the bottle and exactly how much they ate.

P = Pooped. Whenever a kitten pooped before or after their feeding, I write a small P to remind me of who pooped. This way I know if it's been multiple days, and the kitten is struggling with constipation.
